A thorough search of the prior art reveals several inventions that include cameras that notify users of mail delivery, yet none include the remote radio frequency transmitter used to power on the mailbox electronics to send video signals to the receiver for viewing. This extra "step" is considered novel and unobvious when compared to the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Robertson [U.S. 6,307,472] indicates mailbox occupancy.

Hara [U.S. 6,715,669] is capable of handling registered mails with a memory and barcode reader.
